ILLINOIS ASSISTIVE TECHNOLOGY PROGRAM

SMART HOME TECHNOLOGY

Icons: padlock, lightbulb, thermostat, musical note

Home automation that allows a user to monitor and control numerous items throughout the home including security, climate, lighting, appliances, entertainment systems, self-care options, and more.

The **five-room interactive Smart Home display** highlights home automation and provides hands on experience.

Experts in assistive technology can guide you through the kitchen, bedroom, living space, bathroom, and laundry room to discuss your needs and compare different AT devices.
